PROJECTS

Comparative Study of IDS

April 2025

A Hybrid Intrusion Detection System was developed using traditional (signature-based) as well as modern machine learning techniques.

Covid 19!

MAY 2020

A flutter application designed to track the number of Coronavirus cases across the world and also predict the estimated count of the number of cases in each country at the end of the day.

Text Summarizer

APRIL 2020

A web application designed to summarize texts. The summarizer can also compare the outputs produced by various algorithms: SpaCy, NLTk, Sumy and Gensim

Facial Recognition Based Attendance Systems

MARCH 2020

A prototype that is able to give attendance to students automatically using OpenCV and algorithms like LBPH, Eigenfaces.
